

EVRAZ NORTH AMERICA SUPPORTS GOVERNMENT OF CANADA'S INJURY FINDINGS IN LINE PIPE TRADE INVESTIGATION

CHICAGO (March 29, 2016) – EVRAZ North America supports today's Canadian International Trade Tribunal (CITT) finding that Canadian producers have been injured due to dumped and subsidized imports of certain line pipe products from China. The decision applies anti-dumping and countervailing duty measures, established by the Canada Border Services Agency, to restore market-based pricing to Chinese exporters.

"Today's decision allows Canadian pipe manufacturers to compete more effectively in an exceptionally difficult oil and gas market," said Conrad Winkler, President and CEO of EVRAZ North America. "EVRAZ and other steel operations continue to be impacted by the flood of unfairly traded line pipe imports. We are eager to compete globally on a level playing field based on actual economics and capabilities, but we cannot compete with government subsidies and dumping practices."

EVRAZ North America currently employs over 1,800 people in Canada across recycling, steelmaking, and pipe making operations. The company's Canadian line pipe production facilities are in Camrose and Red Deer, Alberta, and Regina, Saskatchewan.
