

EVRAZ

EVRAZ INC. NA

making the world stronger

Our Quality Commitment

EVRAZ North America is a leading producer of engineered steel products that provide the vital foundation for infrastructure across multiple countries — from rail and pipelines to commercial construction and oil and gas exploration. We know our steel has to be as strong as our core values.

In line with those values and our absolute priorities of safety and quality, we commit to our customers (internal and external) that we will:

- Understand and communicate our customers' total quality expectations and work to exceed them.
- Comply with the requirements and continually improve the effectiveness of the quality management systems.
- Use only qualified materials from our approved suppliers.
- Manufacture all our products to approved standards and customer requirements.
- Proactively escalate and resolve all quality issues.
- Continuously improve the quality of our products and the effectiveness of our quality processes.
- Maintain accurate, real-time lot traceability documentation.
- Ensure that all our materials and products are properly segregated, marked and controlled.
- Build a strong quality culture through engagement, collaboration, training, awareness and a focus on quality production.

We are proud to sign our name to every product we make.

On behalf of all members of the EVRAZ North America team, I am pleased to endorse this Quality Commitment.

Conrad Winkler, President and CEO
